MEMORANDUM FOR: Executive Director-Comptroller

SUBJECT : Review of Employee and Dependent Medical Programs

1. This memorandum which is for your information is an initial report on the review of employee and dependent medical programs which was requested by the Director.

2. Information received from the National Aeronautics and Space Administration indicates that:

a. Military astronauts and their families receive regular military medical benefits.

b. Civilian astronauts are provided full medical benefits for all "mission related" matters, while non-mission related matters are the private concern of the individual. Civilian astronaut dependents receive outpatient care only at the medical director's dispensary, member of the family being considered important to the achievement of the astronaut activity. No inpatient care is provided to civilian astronaut families. Although the dispensary outpatient care is a plus, it is clear that civilian astronauts and their dependents have no Government funded medical program comparable to that of the U. S. military establishment.

3. The General Counsel expects to have completed this week the initial review of the military medical programs. When this is accomplished it is planned to meet with him, the Director of Personnel, and the Director of Medical Services to decide further steps toward satisfying the Director's desires. Another report will be submitted following that discussion.
